DETAILED ACTION***Reason for allowance***

The following is an examiner's statement of reasons for allowance: the prior art of records (US Pat. 6, 714,099) fails to teach or fairly suggest a high frequency switch module comprising: high/low-band high frequency switches each switch comprises: a first switch element connected between the high/low-band input/output port and the high-band transmitting port; a second switch element with one end connected to the high/low-band receiving port and the other end grounded; a high/low-band 90-degree phase shifter connected between the high/low-band input/output port and the high-band receiving port; and a high/low-band control port for controlling on-off operations of said first switch element and said second switch element; wherein at least one of said high-band 90-degree phase shifter and said low-band 90-degree phase shifter comprises: a high-pass filter circuit, and a choke line parallel-connected to said high-pass filter circuit, which is a conducting path of control voltage applied from the high-band control port or the low-band control port as called for in claim 1. Therefore, claims 1-3 are presently allowed.
